Michael,
Thank you for the update. Can you please read my statement into the record?

Simsbury Historic District Commission,
Clearly, the application of Nancy Onken is still not conforming to the standards established for the East Weatogue historic district. It is out of character to have such a large structure that dwarfs the house. It is out of character to have a full size tennis court along the road, especially with 20' high lighting. This application, has been properly denied previously and should be denied again. This has been explained to the applicant who refuses to accept that the general plan she is trying to implement does not belong in the historic district nor should it be allowed. The historic district is not a place for a mansion squeezed onto a tiny lot.

Michael,

The attached set of prints contains the elevations, floorplans, details and the site plan for Nancy Onken's proposed building.

Feel free to call should you have any questions.

Thank you very much.
