Simsbury, CT 06070

**Re: Performing Arts Center
Conservation Commission/Inland Wetlands Agency Permit Application
Simsbury, Connecticut
SLR #141.11613.00025.0030**

Dear Mr. Hazel:

SLR International Corporation (SLR) has been retained by the town to develop design plans and regulatory permits for ADA, parking, and stormwater management improvements associated with the Performing Arts Center located in Simsbury, Connecticut. We understand that the town's Inland Wetlands and Watercourses Agency requires a statement from a professional wetland scientist regarding the proposed project's impact on wetlands and/or watercourses located on/or adjacent to a project site. In my professional opinion, the proposed ADA, parking, and stormwater management improvements as shown on the site plans submitted with the Inland Wetlands Permit Application will have no significant adverse impact on the wetlands and/or watercourses located on the property.

If you or your commission has any questions regarding this project, please do not hesitate to call me at (203) 271-1773.

Sincerely,

SLR International Corporation
