Aquarion Improving Simsbury Water Mains

Aquarion Water Company will be cleaning water mains in Simsbury from Tuesday, May 1 through Wednesday, May 23, so we can ensure that you continue to receive the highest quality water.

This project should last approximately four weeks and, during that time, you might notice some discoloration in your water. This discoloration results from the temporary disturbance of the water flow, which stirs up naturally occurring minerals that settle in water mains.

You may want to store tap water in the refrigerator ahead of time for drinking and cooking. And, if your water is discolored, delay washing clothes until it is clear.

We appreciate your understanding and patience. Below, we have provided information concerning where our crew will be for the first week. This information and the following schedules will be available at 1-800-203-7000 and under our alert listings at www.aquarionwater.com. For other questions, please call our Customer Service at 1-800-732-9678.
