

# Registration of a Home Birth Parent's Guide

Prepared by
State of Connecticut
Department of Public Health
Vital Records Unit

#### CONGRATULATIONS ON THE BIRTH OF YOUR BABY!

The State of Connecticut wishes to make the filing of your home birth an easy task. There is information that you will need to provide to the Registrar of Vital Records *in the town in which your child was born* in order to register this birth. This booklet will detail the information required for filing this birth event with the town of birth.

The State of Connecticut requires that the birth worksheets be completed immediately following the birth. The parent(s) is responsible for completing the demographic <u>BIRTH PARENT'S</u> WORKSHEET FOR CHILD BIRTH CERTIFICATE (v2003).

#### The Medical Data Worksheet for the Live Birth Certificate (v2003) is completed by:

- a) the attending practitioner in attendance at or immediately after the birth, or in the absence of such a person;
- b) the birth parent, the non-birth parent, or in the absence of the non-birth parent and the inability of the birth parent;
- c) any other person in attendance at or immediately after the birth.

The birth must be filed with the Registrar of Vital Records in the town in which the child was born not later than ten days after the birth. Prior to the preparation and filing of the birth certificate, the parent(s) need to provide the town Registrar of Vital Records with documentation to prove both pregnancy and birth.

Affidavit forms are provided in this packet for you to establish proof of pregnancy and proof of birth. They must be completed and signed in front of a Notary Public.

If birth parent and non-birth parent are not married, an <u>Acknowledgment of Parentage</u> form must be completed and signed by the birth parent and the non-birth parent before the non-birth parent's information can be placed on the birth certificate. This form is available at the Vital Records Office in the town of birth.

The State of Connecticut Department of Public Health works in coordination with the Social Security Administration to provide the opportunity for parents to secure a Social Security Number for their newborn. If you would like to have this service provided then read, complete, and sign the form entitled <u>Social Security Number for Newborns</u>, which is provided in this packet.

Also included in this packet is the CT-WiZ handout from the CT DPH Immunization program. CT-WiZ is a registry that maintains a permanent record of your child's immunizations for you and your pediatrician.

In addition, at the time of registration, the Registrar will also request to be provided with proof of residency and with photographic identification. Please refer to the list of acceptable documents.

#### REQUIRED DOCUMENTATION

The following list details the documentation that you need to provide to the Registrar of Vital Records in order to properly file your home birth. *Please keep in mind that the Registrar has the authority and responsibility to determine that the evidence presented is authentic and true.* 

#### **Proof of Pregnancy**

(**ONE** of the following must be provided):

A. Signed and dated report from physician, clinic, or CT licensed midwife that provided prenatal care to the birth parent (this report must be made on physician, clinic, or midwife's letterhead stationery),

#### -OR-

B. Notarized affidavits from **two adults**, other than the birth parent or the non-birth parent, having firsthand knowledge of the pregnancy,

#### -OR-

C. A signed and dated report from a practitioner or clinic that provided postpartum care to the birth parent within twenty-four hours after the birth (this report must be made on physician or clinic letterhead stationery).

#### **Proof of Birth**

(ALL of the following are required)

A. A notarized affidavit by the birth parent attesting to the date, time, and place of the live birth as well as notarized affidavits from all adult witnesses to this birth,

#### -AND-

B. A signed and dated report from either the physician or clinic providing medical care to the newborn within 24 hours after the birth, or documentation of the earliest date of medical care given to the infant.

# **Proof of Residency**

(One of the following may be submitted)

- Mortgage statement or lease agreement which includes birth parent's name and address
- Utility bill showing birth parent's name and address
- Birth parent's Driver's license
- Automobile registration showing birth parent's name and address
- Checking account deposit slip showing birth parent's name and address
- Birth parent's Voter Registration card
- State issued identification card which includes birth parent's residency
- Any additional form of documentation deemed necessary by the Registrar of Vital Records

# **Proof of Identity**

- Government issued photographic identification, or if a photo ID is not available, at least two of the following:
  - Social Security card
  - Automobile registration
  - Utility bill showing name and address
  - Checking account deposit slip showing name and address
  - Voter registration card
  - Written verification of identity from employer

# PARENT'S CHECKLIST

וע	d you remember to provide the following information?
	Proof of Pregnancy Documentation
	Proof of Birth Documentation
	Proof of Residency
	Proof of Identity
	Completed Birth Parent's Worksheet For Child Birth Certificate (v2003)
	Completed Medical Data Worksheet for the Live Birth Certificate
	Completed <u>Acknowledgment of Parentage</u> form (if applicable)
	Completed Social Security Number for Newborns form
	Completed Connecticut Higher Education Trust (CHET)

# **Social Security Numbers for Newborns**

The State of Connecticut Department of Public Health and the Federal Social Security Administration are offering you this valuable service.

#### A NOTE FROM SSA:

The easiest time to get a Social Security Number for your child is when you give information for your child's birth certificate. If you wait to apply at a Social Security office, you will need to provide proof of your child's U.S. Citizenship, age and identity. Social Security will also need to verify your child's birth certificate which may take up to 12 weeks.

By completing this form and requesting a Social Security number for your new baby, the State of Connecticut Department of Public Health will electronically transmit your request to the Federal Social Security Administration. A Social Security card will be mailed to you within 3 weeks, eliminating the need for you to personally visit a Social Security office with evidence of your child's identity, birth date and citizenship.

Must your child have a Social Security Number? No, it is voluntary. However, your child will need a Social Security Number in order for you to claim your child on your income tax return, open a bank account for your child, buy savings bonds for your child, obtain medical coverage for your child, apply for government services for your child.

Social Security rarely uses the information you supply for any purpose other than for issuing a Social Security number and card. However, we may use it for the administration and integrity of Social Security programs. We may also disclose information to another person or to another agency in accordance with approved routine uses, which include but are not limited to the following:

- 1. To enable a third party or an agency to assist Social Security in establishing rights to Social Security benefits and/or coverage;
- 2. To comply with Federal laws requiring the release of information from Social Security records (e.g. to the Government Accountability Office and Department of Veteran's Affairs);
- 3. To make determinations for eligibility in similar health and income maintenance programs at the Federal, state, and local level; and
- 4. To facilitate statistical research, audit or investigative activities necessary to assure the integrity of Social Security programs.

Social Security may also use the information you provide in computer matching programs. Matching programs compare our records with records kept by other Federal, State, or local government agencies.

<u>FOR INFORMATION OR ANSWERS TO YOUR SOCIAL SECURITY QUESTIONS</u>, Please contact the Federal Social Security Administration at <u>www.socialsecurity.gov</u> or call toll free: 1-800-772-1213 (for deaf or hard of hearing: call the TTY line at 1-800-325-0778).

#### STATE OF CONNECTICUT

# TREASURER SHAWN T. WOODEN

Congratulations on your new baby! As the father of two boys, I remember the joy of this experience well and I am very happy for your new gift of life.

In all the excitement of this wonderful moment, saving for your child's college education is probably the last thing on your mind. But right now is actually the perfect time to get started.

I am in charge of the state's college-savings program, the Connecticut Higher Education Trust (CHET), which includes the CHET Baby Scholars initiative to give you a head start on having the resources to send your child to college.

With this initiative, when you open a CHET account, the state will deposit the first \$100, without any contribution from you. If you contribute \$150, or save \$150 within the first four years, the state will give you an additional \$150 to put into your child's savings account!

I've had CHET accounts for my kids for a number of years. But I can honestly tell you that I wish I opened them up much earlier than I did.

All you have to do to get started is complete the information at the bottom of this form. Just by checking the box, you will put your child on the path forward to wherever their dreams may take them.

CHET will send you an application packet to help you open the account, or you can open an account online and sign up for CHET Baby Scholars at <a href="https://www.aboutchet.com/babyscholars">www.aboutchet.com/babyscholars</a>.

In only minutes, you can start building your child's foundation to a lifetime of success!

Sincerely,

Shawn T. Wooden Connecticut State Treasurer

The CHET direct-sold plan is administered by the Office of Connecticut State Treasurer Shawn T. Wooden.

TIAA-CREF Individual & Institutional Services, LLC, Member FINRA and SIPC, distributor and underwriter for CHET. 877588

#### **USES OF BIRTH CERTIFICATES**

Some of the most common uses of birth certificates are:

- 1. Establishing the date of birth and age for purposes, such as:
  - entering school
  - obtaining a driver's license
  - proving age for work for minors
  - proving sports eligibility for minors
  - proving age of majority or minority in court cases

- 2. Establishing a birthplace to prove citizenship for purposes, such as:
  - obtaining a passport
  - entering employment limited to citizens
  - obtaining licenses limited to citizens
- 3. Establishing family relationships for purposes, such as:
  - proving legal dependency
  - obtaining inheritance benefits
  - receiving insurance payments
  - conducting genealogy research
- 4. Providing public health information for purposes, such as:
  - evaluating prenatal care
  - immunizing children
  - caring for children with congenital anomalies or abnormal conditions
  - evaluating the needs for health facilities
  - planning and evaluating the effectiveness of family planning programs
  - monitoring risk factors that cause poor pregnancy outcomes

#### PRENATAL INFORMATION

Sources: Prenatal care records, Birth Parent's medical records, labor and delivery records

Information for the following items should come from the Birth Parent's prenatal care records and from other medical reports in the Birth Parent's chart, as well as the infant's medical record. If the Birth Parent's prenatal care record is not in the hospital chart, please contact the Birth Parent's prenatal care provider to obtain the record, or a copy of the prenatal care information.

Preferred and acceptable sources are given before each section.

Please do not provide information from sources other than those listed.

WHERE INFORMATION FOR AN ITEM CANNOT BE LOCATED, PLEASE WRITE "UNKNOWN" ON THE PAPER COPY OF THE WORKSHEET.

☐ Induction of labor: Initiation of uterine contractions by medical a spontaneous onset of labor.	and/or surgical means for the purpose of delivery before the		
□ Augmentation of labor: Stimulation of uterine contractions by drug or manipulative technique with the intent to reduce the time to delivery.			
□ Steroids (glucocorticoids) for fetal lung maturation received by the Birth Parent prior to delivery: Includes betamethasone, dexamethasone, or hydrocortisone specifically given to accelerate fetal lung maturation in anticipation of preterm delivery. Excludes steroid medication given to the Birth Parent as an anti-inflammatory treatment.			
☐ Antibiotics received by the Birth Parent during labor: Includes antibacterial medications given systemically (intravenous or intramuscular) to the Birth Parent in the interval between the onset of labor and the actual delivery: Ampicillin, Penicillin, Clindamycin, Erythromycin, Gentamicin, Cefataxime, Ceftriaxone, etc.			
□ Clinical chorioamnionitis diagnosed during labor or maternal temperature ≥ 38° C (100.4° F): Clinical diagnosis of chorioamnionitis during labor made by the delivery attendant. Usually includes more than one of the following: fever, uterine tenderness and/or irritability, leukocytosis and fetal tachycardia. Any maternal temperature at or above 38°C (100.4°F).			
□ <b>Epidural or spinal anesthesia during labor:</b> Administration to the Birth Parent of a regional anesthetic for control of the pain of labor, i.e., delivery of the agent into a limited space with the distribution of the analgesic effect limited to the lower body.			
□ None of the above			

11f. Method of Delivery:		11g. Maternal morbidity: Serious complications experienced by the Birth Parent associated with labor and delivery. Check all that apply.	
Fetal presentation at birth: Check one.  □ Cephalic: Presenting part of the fetus listed as vertex, occiput anterior (OA), occiput posterior (OP)			
	of the fetus listed as breech, complete tling breech	☐ Maternal transfusion: Includes infusion of whole blood or packed red blood cells associated with labor and delivery.	
breech, frank breech, footling breech  ☐ Other: Any other presentation not listed above  Final route and method of delivery: Check one.  ☐ Vaginal/Spontaneous: Delivery of the entire fetus through the vagina by the natural force of labor with or without manual assistance from the delivery attendant.  ☐ Vaginal/Forceps: Delivery of the fetal head through the vagina by application of obstetrical forceps to the fetal head.  ☐ Vaginal/Vacuum: Delivery of the fetal head through the vagina by application of a vacuum cup or ventouse to the fetal head.  ☐ Cesarean: Extraction of the fetus, placenta and membranes through an incision in the maternal abdominal and uterine walls.  ☐ If cesarean, was a trial of labor attempted? Labor was allowed, augmented or induced with plans for a vaginal delivery.  ☐ Yes ☐ No		□ Third- or fourth-degree perineal laceration: 3° laceration extends completely through the perineal skin, vaginal mucosa, perineal body, and anal sphincter. 4° laceration is all of the above with extension through the rectal mucosa.  □ Ruptured uterus: Tearing of the uterine wall.  □ Unplanned hysterectomy: Surgical removal of the uterus that was not planned prior to the admission. Includes anticipated but not definitively planned hysterectomy.  □ Admission to intensive care unit: Any admission of the Birth Parent to a facility/unit designated as providing intensive care.  □ None of the above	
NEWBORN Sources: Labor and delivery records, Newborn's medical records, Birth Parent's medical records			
12a. Plurality of this birth:		12b. Birth Order of this infant:	
☐ Singleton ☐ Other: ☐ Twins ☐ Triplets ☐ Quadruplets  Include all infants delivered (alive or dead) in this pregnancy when determining plurality.		☐ 1st born ☐ Other: ☐ 2nd born ☐ 3rd born ☐ 4th born  If a multiple birth, circle the birth order of this child named above. Include all infants delivered (alive or dead) in this pregnancy when determining birth order.	
12c. Total LIVE births in this pregnancy:		proprietty with determining and older.	
If not single birth, specify number of infants in this pregnancy born alive.			
12d. Birthweight: Choose one.  GRAMS: or LBS/OZS:/	12e. Apgar score:  Score at 5 minutes:  If 5 minute score is less than 6:  Score at 10 minutes:	12f. Obstetric estimate of gestation at delivery:  Completed weeks:  The birth attendant's final estimate of gestation based on all perinatal factors and assessments, but not the neonatal exam.  Do not compute based on date of the last menstrual period and the date of birth.	

12g. Abnormal conditions of the newborn: Disorders or significant morbidity experienced by the newborn.	13a. Congenital anomalies of the newborn:  Malformations of the newborn diagnosed prenatally or after delivery.
Check all that apply.	Check all that apply.
□ Assisted ventilation required immediately following delivery: Infant	<ul> <li>Anencephaly: Partial or complete absence of the brain and skull. Also called anencephalus, acrania, or absent brain. Also includes infants with craniorachischisis (anencephaly with a contiguous spine defect).</li> </ul>
given manual breaths for any duration with bag and mask or bag and endotracheal tube within the first several minutes from birth. Excludes oxygen only and laryngoscopy for aspiration of meconium.	■ Meningomyelocele/Spina bifida: Spina bifida is herniation of the meninges and/or spinal cord tissue through a bony defect of spine closure. Meningomyelocele is herniation of meninges and spinal cord tissue. Meningocele (herniation of meninges without spinal cord tissue) should also be included in this category. Both open and closed (covered with skin) lesions should be included. Do not include Spina bifida
□ Assisted ventilation required for more	occulta (a midline bony spinal defect without protrusion of the spinal cord or meninges).
than six hours: Infant given mechanical ventilation (breathing assistance) by any method for > 6 hours. Includes conventional, high frequency and/or continuous positive pressure (CPAP).  NICU admission: Admission into a facility or	□ Cyanotic congenital heart disease: Congenital heart defects which cause cyanosis. Includes but is not limited to: transposition of the great arteries (vessels), tetratology of Fallot, pulmonary or pulmonic valvular atresia, tricuspid atresia, truncus arteriosus, total/partial anomalous pulmonary venous return with or without obstruction.
unit staffed and equipped to provide continuous mechanical ventilatory support for a newborn.	□ Congenital diaphragmatic hernia: Defect in the formation of the diaphragm allowing herniation of abdominal organs into the thoracic cavity.
□ Newborn given surfactant replacement therapy: Endotracheal instillation of a surface active suspension for the treatment of surfactant deficiency due to preterm birth or pulmonary injury resulting in respiratory distress. Includes both artificial and extracted natural surfactant.	Omphalocele: A defect in the anterior abdominal wall, accompanied by herniation of some abdominal organs through a widened umbilical ring into the umbilical stalk. The defect is covered by a membrane (different from gastroschisis, see below), although this sac may rupture. Also called exomphalos. Do not include umbilical hernia (completely covered by skin) in this category.
□ Antibiotics received by the newborn for suspected neonatal sepsis: Any antibacterial drug (e.g., penicillin, ampicillin, gentamicin, cefotoxine etc.) given systemically (intravenous or intramuscular).	<ul> <li>Gastroschisis: An abnormality of the anterior abdominal wall, lateral to the umbilicus, resulting in herniation of the abdominal contents directly into the amniotic cavity. Differentiated from omphalocele by the location of the defect and absence of a protective membrane.</li> <li>Limb reduction defect (excluding congenital amputation and dwarfing</li> </ul>
☐ Seizure or serious neurologic	<b>syndromes):</b> Complete or partial absence of a portion of an extremity associated with failure to develop.
dysfunction: Seizure is any involuntary repetitive, convulsive movement or behavior. Serious neurologic dysfunction is severe alteration of alertness such as obtundation, stupor, or coma, i.e., hypoxic-ischemic encephalopathy. Excludes lethargy or hypotonia in the absence of other neurologic findings.	<ul> <li>Cleft Lip with or without Cleft Palate: Incomplete closure of the lip. May be unilateral, bilateral or median.</li> <li>Cleft Palate alone: Incomplete fusion of the palatal shelves. May be limited to the soft palate or may extend into the hard palate. Cleft palate in the presence of cleft lip should be included in the "Cleft lip with or without Cleft Palate category above.</li> </ul>
in the absence of other neurologic findings.  Exclude symptoms associated with CNS	□ Down Syndrome - (Trisomy 21)
congenital anomalies.	□ Karyotype confirmed □ Karyotype pending
□ Neonatal Abstinence Syndrome: Infant diagnosed with Neonatal Abstinence Syndrome based on the results of the hospital's standard screening policy for maternal drugs of abuse and	□ Suspected chromosomal disorder: Includes any constellation of congenital malformations resulting from or compatible with known syndromes caused by detectable defects in chromosome structure.
newborn NAS screening.	□ Karyotype confirmed □ Karyotype pending
□ None of the above	□ <b>Hypospadias:</b> Incomplete closure of the male urethra resulting in the urethral meatus opening on the ventral surface of the penis. Includes first degree - on the glans ventral to the tip, second degree - in the coronal sulcus, and third degree - on the penile shaft.
	□ None of the above

BIRTH PARENT'S NAME:				
REV 01/2022		CONNECTICUT OF PUBLIC HEALTH	DPH)	
BIRTH PARENT'S	S WORKSHEET FO	OR CHILD BIRTH CER	TIFICATE (v2003)	
The information you provide below will be used to create your child's birth certificate. The birth certificate is a document that will be used for legal purposes to prove your child's age, citizenship, and parentage. This document will be used by your child throughout life. State laws provide protection against the unauthorized release of identifying information from the birth certificates to ensure the confidentiality of the parents and their child.				
It is very important that you provide complete and accurate information to all the questions. In addition to information used for legal purposes, other information from the birth certificate is used by health and medical researchers to study and improve the health of Birth Parents and newborn infants. Items such as parent's education, race, and smoking will be used for studies but will not appear on copies of the birth certificate issued to you or your child.
